

PROJECT OVERVIEW

Indiana's health needs healing, with disturbingly high rates of obesity, tobacco use and infant mortality. The One Measure initiative encompasses numerous projects made possible in part by the IU Health Community Impact Investment Fund, a \$100 million fund administered by the IU Health Foundation. Through One Measure, we seek to improve these troubling numbers with collaborative programs designed to improve health throughout our state as well as by building stronger neighborhoods, providing better job and skills training, and offering improved educational opportunities.

CRISIS DIVERSION CENTER PROJECT

LOCATION: Bloomington and Monroe County

IU HEALTH PARTNER: IU Health Bloomington Hospital

PROGRAM BEGINS: 2020

FOCUS AREA: Healthy Living, Workforce Development

COMMUNITY PARTNER: Stride (Monroe County Substance Use Disorder Coalition), a cross-section of community stakeholders including corporate, government, healthcare and non-profit partners. Funding partners from the Coalition who are matching funding from the Community Impact Investment Fund include:

- City of Bloomington
- Monroe County Council and Commissioners
- Bloomington Health Foundation
- Community Foundation of Bloomington and Monroe County
- Cook Group, Inc.
- Indiana State Family and Social Services Administration

IU Health and the IU Health Foundation are investing \$1,050,000 over three years to develop a voluntary system of care for those facing an opioid-related crisis in Indiana's south central region. Instead of transporting those individuals to jail or a hospital emergency room for acute mental illness or substance use, the program will divert them to a therapeutic alternative better able to help. The center will be designed to serve as a safe haven for individuals in crisis, intended to support their immediate needs. Similar models are being deployed in other cities to support this population with demonstrated success.
