

PGY2 Ambulatory Care

PGY2 pharmacy residency programs build on Doctor of Pharmacy (PharmD) education and PGY1 pharmacy residency programs to contribute to the development of clinical pharmacists in advanced or specialized practice. PGY2 residencies provide residents with opportunities to function independently as practitioners by conceptualizing and integrating accumulated experience and knowledge and incorporating both into the provision of patient care that improves medication therapy. Residents who successfully complete an accredited PGY2 pharmacy residency should possess competencies that qualify them for clinical pharmacist and/or faculty positions and position them to be eligible for attainment of board certification in ambulatory care.

The Ambulatory Care residency is designed to deepen the resident's understanding of both practice management and clinical skills necessary to successfully integrate ambulatory care pharmacy services into the healthcare system. The program emphasizes chronic disease management in the primary care setting while also allowing for experience in multiple specialty clinic areas. Service evaluation, creation/enhancement, and third-party reimbursement will be focus areas in each setting in which the resident rotates. The resident will have the opportunity to precept PharmD students in experiential situations and a combination of monthly block and longitudinal experiences will be utilized.

Rotations

Required Block Rotations Orientation (4-5 weeks)* Primary Care 1 (8 weeks)* Primary Care 2 (8 weeks)* Ambulatory Care in Special Populations (4 weeks)* Clinical Administration and Value Based Care (4 weeks)	Elective Block Rotations (5 blocks, 4-6 weeks each) Cystic Fibrosis (Pediatric) Outpatient Endocrinology Inpatient Family Medicine and Transitions of Care Outpatient Hematology/Oncology Outpatient Adult HIV Management Outpatient Neurology Pediatric Ambulatory Care Outpatient Pulmonology, Critical Care, and Allergy Outpatient Psychiatry Outpatient Solid Organ Transplant Specialty Pharmacy and Administration* <i>Other electives may be developed based on resident interest and preceptor availability</i>
Required Longitudinal Rotations (12 months each) New Service Development (½ day per week)* Research (½ day per week) Staffing- Telephonic Hypertension Management (every 4 th Saturday and one evening per week)	
Concentrated Experiences Grand Rounds Portfolio (Presentations/Precepting)	

*All rotations that do not take place within the AAHC are within a 20-mile radius from the AAHC which is approximately a 40-minute drive to the furthest point. Financial support for mileage not provided.

Sample Schedule

DATE	BLOCK 4 days per week	LONGITUDINAL 1 day per week
Block 1	Orientation	New Service/Research
Block 2	Primary Care 1	
Block 3		
Block 4	Elective 1	
Block 5	Clinical Administration & Value Based Care	
Block 6	Elective 2	
Block 7	Primary Care 2	
Block 8		
Block 9	Elective 3	
Block 10	Ambulatory Care in Special Populations	
Block 11	Elective 4	
Block 12	Elective 5	

Residency Completion Requirements

PGY-2 Ambulatory Care Residency Completion Requirements	
General PGY-2 Completion Requirements	Ambulatory Care Specific Completion Requirements
• Earn an “Achieved for Residency” status on at least 80% of the program objectives • Complete a research project with manuscript • Complete an ACPE accredited presentation • Complete 12 months of training	• Complete at least 4 additional presentations ○ At least one nursing or physician education ○ At least one ambulatory care pharmacy education • Participate in Ambulatory Care related committees • Facilitate monthly journal clubs • Complete required appendix topics from list provided by ASHP • Complete all required rotations
