

Facial Plastic & Reconstructive Surgery

Eyelid Surgery Post-Operative Instructions

Day of surgery:

- Apply eye medications as directed, above.
- Some minor bleeding and oozing is normal. If bleeding persists, please notify your physician.
- Your eyes may feel dry. Using preservative-free artificial tears will help alleviate irritation.

Days 2-7:

- Wash face with gentle cleanser, avoiding stress to suture lines.
- Normal activity can be resumed 2 weeks postoperatively.
- Sutures will be removed approximately 5 days after your surgery.
