**Post-Graduate Track: Hospitalist**

**Description**

The Advanced Practice Provider (APP) Hospitalist Fellowship is a 12-month postgraduate fellowship program dedicated to supporting career development of Nurse Practitioners and Physicians Assistants in the specialty area of Hospital Medicine. The curriculum will include didactic instruction, as well as, direct patient care clinical experience.

Fellows will work alongside our current APP and physician staff to expand their knowledge and skills related to the clinical management of hospitalized patients. In addition, Fellows will spend dedicated time with APPs from various subspecialty services as outlined below. Upon successful completion of the program, Fellows will have gained the advanced training needed to be compassionate and efficient hospital-based providers.

**Clinical Areas of Rotation**

- Hospital-based internal medicine
- Pulmonary Critical Care
- Cardiology
- Nephrology
- Infectious Disease
- Peripheral Vascular/Cardiovascular surgery
- Neurosurgery
- Gastroenterology
- Tele Health
- Elective Rotation

**Outcomes**

The outcome of the program is to build confidence and knowledge hospital-based multi-specialty care. The APP fellows will be integrated into the team including the ACGME resident training programs.
