

→ 2018 COMMUNITY BENEFIT
REPORT HIGHLIGHT

ONE
MEASURE

Indiana University Health recently released its 2018 Community Benefit Report featuring projects across the state that highlight the system's investment in its communities. In many cases, those investments take the form of neighborhood improvement projects. By building better parks and playgrounds, we help improve public health in the cities and towns we serve. But our commitment goes deeper. By seeking input from people and community partners and hearing their health concerns – like chronic diseases, tobacco use and the opioid crisis – we can then work together to craft solutions leading to improved quality of life. In 2018 alone, we helped create over \$711 million in community benefit.

2018 DAY OF SERVICE – JAY COUNTY PLAYGROUNDS

LOCATION: Jay County

IU HEALTH PARTNER: IU Health Jay Hospital

FOCUS AREA: Healthy Living

Preschool and elementary students in Jay County can now enjoy healthy play and activities thanks to the efforts of team members from IU Health Jay Hospital on IU Health's 2018 Day of Service. Team members painted inspirational paving bricks and built a ball pit at Redkey Elementary School. At a nearby preschool playground, team members repaired and painted a swing set and installed a new basketball hoop.

This was IU Health Jay Hospital's first Day of Service experience, and all involved were ready to pitch in again to help keep Jay County healthy.
