Post-Graduate Track: Psychiatry

Description

The Advance Practice Provider (APP) Psychiatry Fellowship is a 12-month post-graduate program. The Program is designed to prepare nurse practitioners and physician assistants to provide high-quality care to patients in a variety of settings. The Program includes both didactic and clinical experiences, including rotations in both inpatient, outpatient, and telehealth settings. Rotations will take place throughout IU Health facilities in and around Indianapolis. Didactics will be presented on various topics throughout the year and will also include options to participate in case presentations and journal club activities. The education team is comprised of experienced psychiatric faculty and clinical providers, whose goal is to ensure a rigorous and productive fellowship experience.

Clinical Areas of Rotations

1. Emergency Psychiatry/Crisis Intervention
   • Addiction treatment
   • Homeless Outreach
   • Toxicology
   • Safety evaluations and management of threats to self and others
   • Telepsychiatry
2. Inpatient Psychiatry
   • ECT
   • Partial Hospitalization
   • Addiction treatment
   • Evaluation and management of psychotic disorders
3. Consultation/Liaison Psychiatry
   • Collaborative/Integrated Care
   • Palliative Care
   • Assessment and management of delirium
4. Outpatient Psychiatry
   • Telepsychiatry
   • Eating Disorders
   • Corrections/Forensics
   • Geriatrics/Nursing facility
   • Women’s Health
   • Child and Adolescent
   • Electives:
     1. Management of Chronic Pain
     2. Treatment refractory mood disorders (TMS/neuromodulation)
     3. Co-morbid psychiatric and addiction disorders

Outcomes

The goal of the program is to build provider knowledge base, skill set, comfort level, and confidence in providing high-quality mental health care. The APP Fellow will be integrated into both the clinical and academic teams, including the ACGME resident training program.
